

Audio Video Display System (AVDS) Video Display System (VDS)

Distribute high resolution video and multimedia content to
multiple digital displays in real time

A one-to-many, point-to-multi-point system for transmission of high quality computer audio/video or video over CAT5 cable, the AVDS and VDS systems distribute rich content in real-time from any type of player/ computer to multiple display devices.

Distribution to hundreds of display screens over flexible CAT5 cable

- High resolution (1600 x 1200 @ 75Hz) support
- Extend displays up to 110m/360ft from the player/computer
- Out-of-band – frees network from heavy image transfer
- No player or computer needed at display end
- Optional 2 button control accessory via serial cable
- 3 year warranty
